

Bon matin tout le monde. Ca va ?

I had intended doing Japan for our topic in Term 4 – but UNFORTUNATELY we are not at school. So instead, we'll do the best we can online.

Here are some interesting facts about Japan.

- Japan is located in the Pacific Ocean, consists of 6852 islands although only four islands make up most of the country.
- The Japanese name for the country is Nippon – “sun of origin” – known as “the land of the rising sun”
- The highest point in the country is Mount Fuji.
