

## Nature Art

If you haven't any flowers except maybe daisies or dandelions you could still, make some nice pictures with your child. Get a basket or bag and collect what you see in your garden. You can download an app that will identify what you have picked. FlowerChecker and NatureGate will identify your photo. Google Goggles can be used in the same way.

You and your child could draw people, faces, vehicles etc on pebbles. Ask your child what they want you to make. Suggest a favourite character, toy, film or family member. You could also make up a story for your picture or recreate a storyline from a favourite book or film.

If you have flowers that you can use, you will be able to make a lot more colourful pictures.

Discuss what colours you are using and how the flowers, leaves, twigs etc feel.
