

**Class Atlantis are exploring numbers:**

**Sing number songs and do the actions with your child, for example, 5 little Ducks, 5 little monkeys jumping on the bed, 10 in the bed etc**

**Count as you play and move, for example, count the stairs as you climb them, count how many times you can bounce or catch a ball, count jumps on a trampoline etc**

**Build towers and count how many bricks high they are. Enjoy knocking them down afterwards! Make rows of sand castles and/or mudpies and count how many there are before you squash them.**

**Find any items around the house with numbers on them between 1 and 10. Can you put them in order? Practise writing the numbers indoors, and outside using chalk, water and paintbrushes, squeeze bottles, in sand and or mud.**

**Make "birthday cakes" using playdough, mud, sand, bread rolls, fairy cakes etc.**

**Count "candles" as you add them- these can be made out of cut up straws or twigs outside etc**
