

Hi Class Discovery

You will all have received your 'Home work pack' for June hopefully by now, and here are a few more activities that I think you will enjoy and which will help to keep your mind active ready for when we come back to school.

There are lots of dot to dots this week, helping you to count to small and big numbers and even counting on in two's.

Some of the dot to dots use the alphabet instead of numbers so these might be a bit trickier but try and have a go if you can manage.

I have included a non – cook recipe for playdough and I will add some play dough mats for you to use next week.

There are also some pictures of the Northern Lights for you to colour in, or you can use paints, or collage. Remember when we learned about the colourful northern lights last term as part of our Space topic?

Have a good week

Mrs Reeves
